

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

1. (Cancelled)

2. (Currently Amended) ~~The tonneau system according to Claim 1~~
~~wherein~~ A tonneau system for a cargo box of a vehicle, said cargo box having a wall,
said tonneau system comprising:

a support frame having a rail positionable generally adjacent the wall of
the cargo box;

a cover spanning said support frame; and

a seal member fixedly retained by said rail of said support frame, said seal
member having an elongated leg portion positionable along a top surface of the wall of
the cargo box to provide a sealing engagement therebetween, said seal member
comprises:

a first portion slidably engaged with a channel formed in said rail;

a second portion coupled to said first portion, said second portion being
generally D-shaped; and

said elongated leg portion flexurally coupled to said second portion.

3. (Original) The tonneau system according to Claim 2 wherein said
elongated leg portion is normally biased in a downwardly position.

4. (Cancelled)

5. (Currently Amended) ~~The tonneau system according to Claim 4~~
wherein A tonneau system for a cargo box of a vehicle, said cargo box having a tailgate,
said tonneau system comprising:

a support frame having a rail positionable generally adjacent the tailgate of
the cargo box;

a cover spanning said support frame; and

a seal member fixedly retained by said rail of said support frame, said seal
member having an upwardly inclined leg portion positionable adjacent the tailgate of the
cargo box to provide a sealing engagement therebetween, said seal member
comprises:

a first portion slidably engaged with a channel formed in said rail;

a second portion coupled to said first portion, said second portion being
generally D-shaped; and

said upwardly inclined portion flexurally coupled to said second portion.

6. (Original) The tonneau system according to Claim 5 wherein said
second portion and said upwardly inclined portion cooperate to form a channel for
collecting and directing water outwardly.

7. (Cancelled)

8. (Currently Amended) ~~The tonneau system according to Claim 7 wherein~~ A tonneau system for a cargo box of a vehicle, said cargo box having a wall, said tonneau system comprising:

a support frame having a rail positionable generally adjacent the wall of the cargo box;

a cover spanning said support frame; and

a seal member fixedly retained by said rail of said support frame, said seal member having an elongated leg portion positionable overlapping a seam extending between a top surface of the wall of the cargo box and said support frame to provide a sealing engagement therebetween, said seal member comprises:

a first portion slidably engaged with a channel formed in said rail;

a second portion coupled to said first portion, said second portion being generally D-shaped; and

said elongated leg portion flexurally coupled to said second portion.

9. (Original) The tonneau system according to Claim 8 wherein said elongated leg portion is normally biased in a downward position.
